

Kim's game

Instructions:

Put a selection of objects on a tray up to 10, talk to your child about each object one at a time.

Then give your child time to look at the tray, once the children have had time to look cover the tray with a tea towel and take an object away.

Ask your child to see if they can identify which object is missing.

Continue this by replacing the object with another.

You may then ask your child what all of the objects were to see if they can remember all of the objects you started out with.
